ANNUAL REPORT OF MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program. An operator conducting mining operations under a Notice of Intention must file an annual operations and progress report (FORM MR-AR) with the Division.

I. General Information

1. Report Time Period: From (mo./yr.) 5-19-99 To (mo./yr.) 1-31-2000

2. DOGM File Number (Mine No): 5270079

3. Mine Name: CAMBRIILLIC MINE

4. Mineral(s) Mined (or permitted to mine): _____

5. Type of mine ☒ Surface Mine or ☐ Underground Mine

6. Legal Description (Location of Lands Affected):

SE 1/4, SW 1/4, _____ 1/4, Section 14, Township 17E, Range 13W
____ 1/4, _____ 1/4, _____ 1/4, Section _____, Township _____, Range _____
____ 1/4, _____ 1/4, _____ 1/4, Section _____, Township _____, Range _____

7. Name of Operator or Company: CAMBRIILLIC NATURAL STONE, L.C.

8. Permanent Street Address: 1730 S 1100 EAST

City, State, Zip: SALT LAKE CITY, UT 84105-3424

Phone: 801 983-7002 Fax: 801-486 0174

9. Company Representative (or designated operator):

Name: William J. FAPPAS MANAGER

Title: MANAGER

Business Address: 1730 S 1100 EAST

City, State, Zip: SALT LAKE CITY UT 84105 3424

Phone: 801 983 7002 Fax: 801 486 0174

☐ Please check if any of the above information has changed since previous year.

II. Mining and Reclamation

1. Was there any mine related activity during the past year? Yes ☐ No ☒

2. If no - what was the last year of activity? None

3. If yes - how much ore or mineral was mined? None

4. Briefly describe the type of work performed, volume of material moved, and any new or additional surface disturbances that occurred during the past year.

None

5. How much **additional acreage** was disturbed during the past year? None

6. How much acreage was **reclaimed** during the past year? None

7. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results. None

8. What is the **total** disturbed acreage of entire project at years end? None

9. Briefly summarize any mining and/or reclamation plans for the upcoming year.

1

NOTE: Section III., "Additional Information" applies only to large mining operations.

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.

IV. Signature Requirement

I hereby certify that the foregoing is true and correct.

Name (Typed or Print):

Title of Operator:

Signature of Operator:

Date:

ATTACHMENT #1

PROPOSED OPERATION

The proposed mining operation will be a quarry type excavation exposing the in-place liney shale rock to be excavated. This mine plan is to mine approximately 25 tons per pay or more at the start of operations. Trucks, dozers and rubber tired loaders will be used to excavate the raw material. The product will be loaded on flat-bed trucks and hauled to a staging area where it will be hand sorted and placed on wooden pallets (approx. 300 lb. each), banded and shipped out of the mining area by commercial carriers.

Dozers will scrap off the thin surface soil and over-burden material. This material will be placed in a nearby area for future reclamation use. The waste material contained in the formation will be dozed or dumped in a waste dump area near the quarry pits and used for replacement fill after operations are closed.

Water, from an existing spring approximately two miles southeast of the quarry, will be used to help part the thin bedded stone and also to roughly clean the selected material.

Three small pits will be opened. Each pit will be about 300ft long and 100ft wide. Total disturbed area for this operation will be as follows:

3 Quarry Pits 3x300x100	= 90,000sq ft
3 Dump Areas 3X300X60	= 54,000sq ft
3 Reclamation Dumps 3X50X25	= 3,750sq ft
Roads New & Improved 3600X10	= 36,000sq ft
Staging Area 100X200	= 20,000sq ft
Miscellaneous	= 14,000sq ft
Total Square Feet	= 217,750sq ft
<u>Maximum Acres To Be Disturbed</u>	<u>= 4.99 Acres</u>

See attached location map and photo for details and approximate location of the above described areas.
